Personalise your PC with as many colour options as your imagination allows.

# HUGE

## LIQUID COOLER

**Liquid cooling systems** offer a more efficient and quieter solution for cooling computer components than traditional air coolers. These systems use liquid (usually water) to **cool heat-generating** components such as the processor and graphics card. The liquid removes and dissipates heat more quickly and efficiently, which allows components to stay cooler and perform better.

# SIMPLE CARE

Easily **removable dust filters** for convenient cleaning and maintenance.

**intel** Processor

# DOMINATE

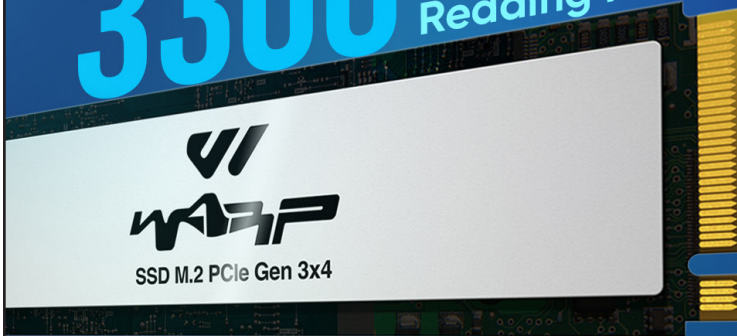

Take your computer's performance to a level that pushes the limits with the new generation Intel processors in this chassis. Play the latest games at the highest settings without any problems. Run demanding programs and applications in seconds. Save time by increasing productivity and complete your work faster. Enjoy a pleasant usage experience for many years by extending the life of your computer.

# SSD NVMe M2

**Warp NVMe SSD** is a revolutionary storage solution designed to take your PC's performance to the next level. Equipped with a PCIe 4.0 interface and the latest 3D NAND flash technology, the Warp NVMe SSD delivers blazing read and write speeds compared to traditional SSDs, giving you a massive performance boost for intensive tasks like gaming, graphics design and data processing.

**3300** MB/s  
Reading Rate

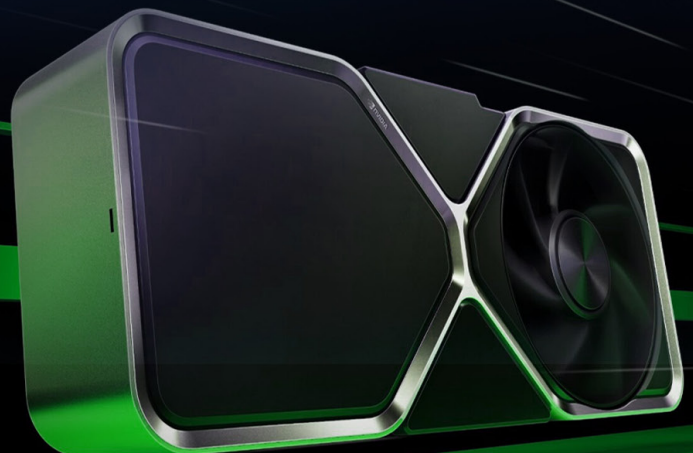

**Warp NVMe SSD's 3300 MB/s** read speed revolutionises data access. This superior speed means instant file transfers and operating systems load in seconds, so you can focus your time on productivity and innovation instead of waiting.

## GeForce RTX 40 Series

With its innovative architecture and superior performance, **NVIDIA GeForce RTX 40 series** graphics cards take your gaming experience to a whole new level.

**with GeForce RTX 40 Series:**

- Play the latest games at the highest settings without any problems.
- Beat your opponents in e-sports games.
- Get the best experience in **virtual reality** and augmented reality applications.

# HV<sup>85+</sup> PRO 650W

Double  
Processors  
Power Connections

**85 Plus® Bronze certified, save energy with up to 85% efficiency.** 650W of power for uninterrupted performance even when pushing the latest generation processors and graphics cards. Low noise operation with a single silent **120mm fan**. Modular cable design eliminates cable clutter and keeps the case organised.
